

Welcome to Agri-CAST Weather and Spray Window Forecaster

. agri-cast update 2008 . agri-cast update 2008 . agri-cast update 2008 . agri-cast update 2008 . grower update 2008

Agri-CAST has many unique features:

- 5 day weather forecasts with graphical and numerical display of data for 10 variables by hour including a daily **Frost Warning**.
- **Spray Window Predictor** hourly predictions 5 days forward on forecast spraying conditions covered by interpretive models validated by our technical team. Ground, aerial and Delta T models available.
- 600+ weather station sites across the agricultural cropping areas of Australia.
- Agri-CAST is a **forecast service only** – local conditions need to be assessed at the time of any chemical application to ensure use is within label and industry recommendations.
- Access is through the internet at: www.syngenta.com.au
- Qualifying users will need to create their own username and password when registering on the Syngenta website www.syngenta.com.au
- Existing registered users can retrieve forgotten username and password from the site. There is a link to www.syngenta.com.au that will email details.
- When logged on and with access granted to the services, users will see the Agri-CAST banner on their home page - click on this banner to be linked through to Agri-CAST.

Please register at www.syngenta.com.au then fax or post below:
